A Case for Use: Government Agency

Federal Communications Commission

As the highest authority in enforcing communications law and regulations in the U.S., the Federal Communications Commission (FCC) regulates interstate and international communications by radio, television, wire, satellite, and cable in all 50 states, the District of Columbia and U.S. territories.

Equal and unimpeded access to the information disseminated from the FCC website and its forums is the right of every U.S. citizen, making digital accessibility key to ensuring the ability of all citizens to digitally interact with the agency and the many services made available from its website.

AudioEye Integration: www.fcc.gov

Accessibility
The international symbol for Accessibility marks the entrance to the Ally Toolbar, indicating the site is Accessible and Customizable.

"AudioEye is a true tech leader and innovator, offering a powerful tool that goes beyond accessibility to enhance usability, allowing every visitor to customize their experience."
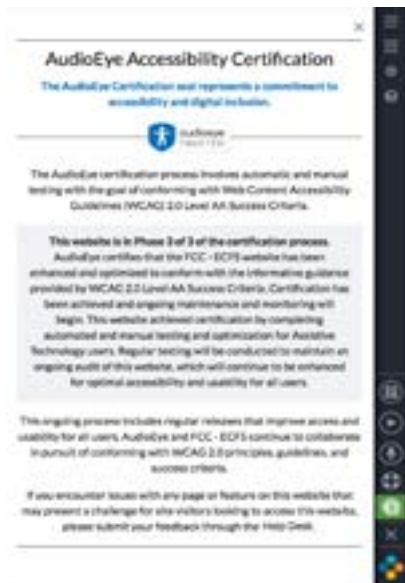

– Dustin Laun, FCC ctr. Technology Advisor, CEO mobotour

The AudioEye Technology

Since deploying AudioEye in December of 2014, the FCC has expanded its adoption of the Ally Platform, relying on AudioEye for continuous auditing, testing, remediation and WCAG 2.1 AA and Section 508 compliance monitoring.

The AudioEye solution is enabled across the online Consumer Complaint Center, which is powered by Zendesk, the industry-leading Help Desk SaaS solution. The AudioEye PDF solution is also integrated with the Electronic Comment Filing System (ECFS) portal to assist in making tens of thousands of PDFs more accessible.

Across the FCC's diverse and robust digital ecosystem, the agency has gone the extra mile, implementing the Ally Toolbar, which provides web personalization options for better usability.

"AudioEye is a great partner. We worked on a complex project with many moving parts, illustrating the commitment of the FCC to ensure all Americans have full access to their website and content. Through seamless integration with Zendesk, a 3rd party platform, AudioEye ensured the site and Consumer Help Center were fully accessible. Their technology is revolutionary; the ease-of-use and simplicity of their implementation process makes AudioEye solutions even more powerful."

– Dustin Laun, FCC ctr. Technology Advisor, CEO mobotour

Sustainable Accessibility Solutions

The AudioEye suite of products and services are designed to provide sustainable accessibility, enhance the user experience, and provide viable solutions for any enterprise with an online presence. In fact, AudioEye's secure and trusted dynamic remediation technology **publishes more than one billion fixes daily**. AudioEye is the only technology-first, end-to-end web accessibility solution available that guarantees speed-to-compliance with ADA-related requirements on existing websites.

AudioEye exists to make digital content more accessible, and more usable, for more people.
