

SATISFI LABS

Experience the power of generative AI

Satisfi Labs is revolutionizing visitor engagement by transforming potential travelers into delighted visitors. The robust AI chat fosters meaningful conversations that guide visitors to explore your destination. It's more than just technology — it's a pathway to creating memorable and satisfying experiences for every visitor.

LET'S TALK

Redefine the visitor experience with **automated answers**

Captivate guests with generative AI Chat

Elevate customer interaction with real-time, 24/7 conversations revolving around your destination. Provide easy access to the most specific information generated from your website, blog, or feed.

Impact on a brand's perception

Take control of your messaging with the ability to create and manage pre-written responses. Ensure consistent messaging across multiple channels that align with your marketing goals.

Powerful reporting, profound insights

Utilize advanced analytics to gain profound insights into visitor preferences, traffic, and trends. Use these insights to craft data-driven marketing campaigns that resonate with your audience.

Increase conversion with Live Chat

Seamlessly transition conversations between the AI chat and live agents when needed using intent-based routing.

Connect partners & visitors

Boost local economic development by promoting and featuring detailed information about local businesses. Provide rich descriptions, images, locations, dates, and links to support local partners and enhance visitor experiences.

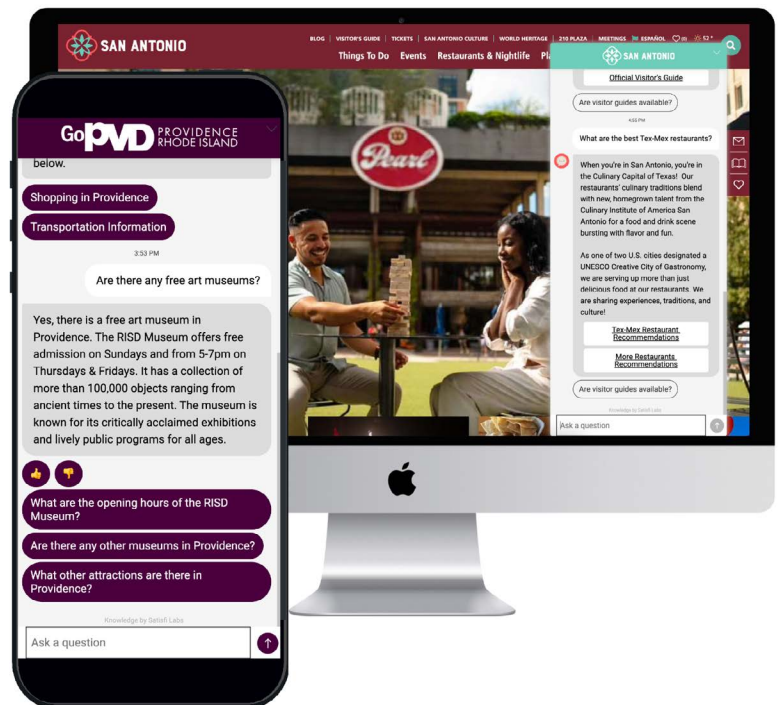

Your website & beyond

Drive visitors to your website through additional entry points with QR code access and direct linking from marketing emails and social media.

Product Highlights

- Leverage generative AI to pull data from your website, blog or feeds
- Engage across multiple channels and entry points
- Gather unique customer data with intent reporting
- Escalate to a live agent using Bridge Live Chat

We see a lot of value in using AI Chat to see what people are asking. **Our team has spent years making assumptions and trying to understand our users as much as possible, but nothing beats having a conversation with a human to really understand what they want.** It's almost like being a fly on the wall with that person, so I find it unique and helpful to use this technology."

CHRISTINE FELTON | Director of Content & Digital Marketing, Visit Austin

Drive your destination organization to new heights by providing an exceptional and unforgettable visitor experience.
