

Remove barriers to web accessibility.

AudioEye allows website visitors to customize their browsing experience to meet their specific needs related to vision, hearing, motor, and cognitive abilities.

LET'S TALK

Your web accessibility solution is simple.
It's Simpleview + AudioEye.

Legal compliance

Maintain compliance with laws such as the Americans with Disabilities Act (ADA) to protect your organization from potential lawsuits

Customer satisfaction

Accessible content improves engagement, making it more user-friendly for people with and without disabilities, leading to higher customer satisfaction

Brand discoverability

Accessible websites are easier for search engines and voice experiences to index, boosting discoverability and improving SEO

Brand reputation

Reduce brand risk and improve reputation by supporting diversity, equity, and inclusion initiatives through accessible design

**Accessible & compliant websites –
at a fraction of the cost**

- We offer **industry-leading automated fixes** built right into the design
- We handle the technical details by **auditing your content and building custom fixes**
- With active monitoring, we **find issues and fix content** in real-time
- **We save you money** over testing platforms and consulting services with our comprehensive solution
